Adam A.S. **Green**, PhD

adam.aagen.green@gmail.com | (720) 278-5986 | www.linkedin.com/in/adamasgreen

Key Skills and Highlights

Research — Developed integrated hardware and software measurement platforms to image fast-time dynamics of condensed matter systems; Skilled scientific writer and communicator; Experienced interdisciplinary and international collaborator; Mentorship and supervision of 4 undergraduate research students; Experience as both team leader and contributor

Programming — *Python* (pandas, matplotlib, numpy, scipy, trackpy), *FORTRAN* (lapack), *Mathematica*, *openFOAM*, LaTeX, SQL, git

Achievements — First place in 2017 NSF MRSEC Center *Science Slam* (3-minute scientific presentation competition), 4 peer-reviewed publications in 4 distinct subfields, Poster presentation at the International Liquid Crystal (2017), Oral presentation at the Ferroelectric Liquid Crystal Conference (2019)

Education

Ph.D Physics University of Colorado Boulder . . . . . July 2019

-Liquid and Crystal: The Applicability of the XY Model to Experimental Systems of Two-Dimensional Topological Fluids; and Revealing the Nanoscale Structure of the Bent-Core Alpha Phase

M.S. Physics University of Colorado Boulder . . . . . May 2015

B.Sc. Physics Honours (First Class) University of Calgary . . . . . May 2011

-Improving the Efficiency of a Controlled Dipole Quantum Memory

Experience

Graduate Researcher University of Colorado Boulder, CO, USA 2015-2019

Fluid Dynamics	*Investigated and developed novel metrology applications for liquid crystal fluids*
Materials Science	*Discovered two new phases of matter using electro-optical, X-ray techniques*
Soft Matter	*Investigated the nucleation of topological defects in liquid crystal system using classical and machine learning methods*

Graduate Researcher NIST, Boulder, CO, USA 2013-2015

Optics	*Designed and fabricated whispering gallery optical cavities for laser frequency stabilization applications*

Undergraduate Researcher University of Calgary, AB, CAN 2007-2012

Quantum Optics	*Designed an optimally efficient optical quantum memory*
Quantum Statistics	*Investigated statistical convergence of bosonic and fermionic systems*
Complexity Science	*Studied the time and space correlations of earthquake magnitudes*

Publications

Minor, E. N., Howard, S. D., Green, A. A. S., Park, C. S., and Clark, N. A. (2019). End-to-End Machine Learning for Experimental Physics: Using Simulated Data to Train a Neural Network for Object Detection in Video Microscopy. *arXiv:1908.05271 [cond-mat]*. arXiv: 1908.05271

Green, A. A. S., Dutch, E., Qi, Z., Briggs, C., Park, C. S., Glaser, M. A., Maclennan, J. E., and Clark, N. A. (2019b). A gas flow meter with linear sensitivity based on freely-suspended nanofilms of smectic liquid crystal. *Appl. Phys. Lett.*, 114(16):163705

Green, A. A., Tuchband, M. R., Shao, R., Shen, Y., Visvanathan, R., Duncan, A. E., Lehmann, A., Tschierske, C., Carlson, E. D., Guzman, E., Kolber, M., Walba, D. M., Park, C. S., Glaser, M. A., Maclennan, J. E., and Clark, N. A. (2019a). Chiral Incommensurate Helical Phase in a Smectic of Achiral Bent-Core Mesogens. *Phys. Rev. Lett.*, 122(10):107801

Loh, W., Green, A. A. S., Baynes, F. N., Cole, D. C., Quinlan, F. J., Lee, H., Vahala, K. J., Papp, S. B., and Diddams, S. A. (2015). Dual-microcavity narrow-linewidth Brillouin laser. *Optica, OPTICA*, 2(3):225–232

Heshami, K., Green, A., Han, Y., Rispe, A., Saglamyurek, E., Sinclair, N., Tittel, W., and Simon, C. (2012). Controllable-dipole quantum memory. *Phys. Rev. A*, 86(1):013813

Davidsen, J. and Green, A. (2011). Are Earthquake Magnitudes Clustered? *Phys. Rev. Lett.*, 106(10):108502

Hobbies and Interests

- *Birdwatching and Nature*— the Front Range is rich in its variety of ecosystems and native species, and it is a constant delight to be out among them.
- *Board Games*— Fellow graduate students introduced me to the joys of gaming, my current favourite is Carcassonne.
